This event is honoured to welcome Setsuko Thurlow, a Japanese–Canadian nuclear disarmament campaigner who survived the atomic bombing of Hiroshima on 6 August 1945. In 2017, she co-accepted the Nobel Peace Prize on behalf of the International Campaign to Abolish Nuclear Weapons (ICAN) and has since remained an impactful advocate for nuclear disarmament and non-proliferation. Young talents and students are especially encouraged to take part in this unique opportunity to engage with one of today's most pressing conversations at the intersection of technology, innovation, and global responsibility.
